

Tailored Job Application & ATS Strategy Report

Candidate: **Rowan Sterling** (rowan_1787901758.280612@example.com) | Generated: August 28, 2026 12:52 UTC

Target Role	Software Engineer	Overall Readiness	73%
Technical Strength	76/100	Interview Readiness	63/100
Communication	81/100	Skill Proficiency	78/100

1. Current Skills & Target Gap Intelligence

Verified Candidate Skills: Python, SQL, Machine Learning

Missing / Target Skill	Role Importance	Est. Learning Timeline	Action Item
Data Structures	High	2-3 Weeks	Practice hands-on projects and mock interview questions targ...
Algorithms	High	2-3 Weeks	Practice hands-on projects and mock interview questions targ...
Git	Medium	2-3 Weeks	Practice hands-on projects and mock interview questions targ...
System Design	Medium	2-3 Weeks	Practice hands-on projects and mock interview questions targ...

2. Top Predictive Career Path Benchmarks

Role Title	Match %	Missing Skills	Growth Level	Prep Time
Machine Learning Engineer	53%	Scikit-Learn, Deep Learning	Exponential	4 - 5 Months
Data Scientist	53%	Pandas, NumPy	Very High	4 - 5 Months
AI Engineer	45%	Deep Learning, PyTorch	Exponential	4 - 8 Months
Data Analyst	45%	Excel, PowerBI	High	3 - 6 Months

3. Future Skill Demand Horizons (1-3 Years)

Skill Domain	Current Score	1-Year	2-Year	3-Year	Growth %
AI Application Security & OWASP LLM	68/100	82/100	91/100	97/100	+42.6%
eBPF & Observability	65/100	76/100	86/100	92/100	+41.5%
Rust for High Performance	70/100	80/100	89/100	95/100	+35.7%
Autonomous Agentic Frameworks	74/100	88/100	95/100	99/100	+33.8%

4. Explainable Score Breakdown & Recommended Next Actions

Score Rationale: Career Match score of 73% for Software Engineer reflects strong technical capability in Python, SQL, offset by 2 missing prerequisite skill(s) (Docker, AWS Cloud).

- **Action:** Build a mini-project integrating Docker to bridge target role gaps.
- **Action:** Build a mini-project integrating AWS Cloud to bridge target role gaps.
